- Critical Thinking
- IT Support Services

EXPERIENCE

Student Developer – Local Souvenir Marketplace System (Calabanga) (School Project)

Developed a marketplace system that enables local business owners in Calabanga to showcase and sell their souvenir products. Designed and implemented key features such as product listings, user and seller accounts, and ordering functionality. Collaborated with team members to plan, develop, and test the system while ensuring a user-friendly interface and smooth navigation. Applied problem-solving and basic programming skills to enhance system performance and usability.

Freelance IT Support (Self-initiated)

Provided basic technical support by activating Microsoft Windows and installing essential software for clients. Performed basic computer troubleshooting, including diagnosing and resolving common hardware and software issues. Assisted users in maintaining system functionality and improving overall computer performance through simple technical solutions.
